INDEX TO VOLUME XLV

[NOTE.—In this index the title of principal papers and headings of departments, as *Discussions* are in italics.]

Abstracts—
Alteration and metallization in the Bagdad porphyry copper deposit, Arizona (Anderson), 609
Appraisal of ore reserves at a Japanese copper mine (Collins), 568
Behavior of some diabase and basalt dilation dikes in the Union Companion mine, Cornucopia, Oregon (Fredericksson), 201
Biogeochemical investigations in the Tri-State district (Harbaugh), 548
Characteristics of marine uranium-bearing sedimentary rocks (McKelvey and Nelson), 35
Current U. S. Geological Survey investigations in the Iron Ranges of northern Michigan (James), 385
Detailed survey of the chemical composition of rock layers in an agricultural limestone quarry (Keller, Klemme, and Pickett), 461
Differential thermal curves of certain hydrous and anhydrous minerals, with a description of the apparatus used (Kauffman and Dilling), 222
Dispersion of copper from the San Manuel copper deposit, Pinal County, Arizona (Lovering, Huff, and Almond), 493
Effects of earthquakes, trains, tides, winds, and atmospheric pressure changes on water in the geologic formations of southern Florida (Parker and Stringfield), 441
Experiments on the deposition of iron with special reference to the Clinton iron ore deposits (Castaño and Garrels), 755
Extracts from notes on geothermics, 1949 (Van Orstrand), 388
Function of a mine geological department (Bateman), 390
Genesis of asbestos and barite, Cuddapah district, Rayalaseema, south India (Murthy), 681
Genetic classification of the bed rock hypogene mineral deposits (Schmitt), 671
Genetic classification of the hypogene mineral deposits (Part I) (Schmitt), 387
Geologic and structural environment of the iron ore deposits of Mexico (Flores), 105

Abstracts—Continued
Geologic features of North Dakota lignite (Roe), 434
Geological and botanical study of the Brandon lignite and its significance in coal petrology (Barghoorn and Spackman), 344
Geology of the Aguilar lead-zinc mine, Argentina (Spencer), 388, 405
Geology of the Broadway Tunnel, Berkeley Hills, California (Page), 142
Geology of the fissionable materials (Bain), 274
Ground-water geology of the Gonaïves Plain, Haiti (Taylor and Lemoine), 127
Ground-water problems in the Philadelphia area (Graham), 210
Lithium-bearing pegmatites in northern Quebec (Derry), 95
Manganese on Punta Concepcion, Baja California, Mexico (Noble), 771
Massive leucoxene in Adirondack titanium deposit (Wheeler), 574
Method for determining the direction of flow of hydrothermal solutions (Smith), 62
Methods used to determine grade and reserves of pegmatites (Page and Norton), 387
Mining geology: A science (Kaiser), 482
"Nevadan"—"Laramide"—Tertiary upheaval and related ore deposits (Wisser), 386
Ores and mining in the Itabira iron district, Brazil (Whitehead and Dorr), 389
Origin of the "epithermal" mineral deposits (Schmitt), 191
"Pneumatolysis" and the liquid inclusion method of geologic thermometry (Kennedy), 533
Polarization figures and rotation properties in reflected light and their application to the identification of ore minerals (Cameron and Green), 719
Portion of the system silica-water (Kennedy), 629
Production, classification, and utilization of western United States' coals (Parry), 515
Prospecting for zinc using semiquantitative chemical analyses of soils (Fulton), 654

Abstracts—Continued
Radiation surveys with a scintillation counter (Brownell), 167
Significant replacement textures at Cobalt and South Lorraine, Ontario, Canada (Bastin), 808
Special field applications of a confirmatory test for lead (Jerome), 358
Status of coal resources studies (Searight), 324
Structural and tectonic studies in the Cobar mineral field, New South Wales (Joklik), 331
Structural control of orebodies as illustrated by the use of vein contours at the O'Brien gold mine, Cadillac, Quebec (Mills), 786
Structural control of some gold-base metal veins in eastern Grant County, Oregon (Allen), 387
Structure and mineralization maps as a guide to mining in the Picher mining field (Lyden), 385
Summary of Horikoshi's structure of cupriferous pyrite deposits in schist (Collins), 480
Uniformitarianism and the ideal vein (Schmitt), 54
Uraninite in the Coeur d'Alene district, Idaho (Thurlow and Wright), 395
Uranium in pegmatites (Page), 12
Uranium-bearing sandstone deposits of the Colorado Plateau (Fischer), 1
Value of domestic production of minerals from various classes of rock (McKelvey, Crawford, Davidson, and Boardman), 470
Why hasn't geophysics been applied more intensively to the mining industry in the past and what should be done about it in the future? (Koulomzine), 389
Adams, G. I., on barite, 693
Adams, L. H., on water, 648
Adirondack titanium deposit, Massive leucoxene in (Wheeler), 574
Adsorption, 47
Aerial photos, coal, strip mines, U. S., 326
Aeschynite, 286
Agout, M., review of book by, 486
Aguilar lead-zinc mine, Argentina, The geology of the (Spencer), 405
Ahlfeld, F., on folding, 430
Alabandite, thermal curve, 236, 237
Alaska, uranium, Nome beach placers, 43
Albite, 104
